

Table of Contents

Invited Talks

Efficient Data Structures for Deduction Systems	1
<i>H. J. Ohlbach</i>	
Inductive Logic Databases: From Extensional to Intensional Knowledge	3
<i>P. A. Flach</i>	
Sharing Software Tools on the Web: The IDEA Web Lab	4
<i>S. Ceri, P. Fraternali, S. Paraboschi, and G. Psaila</i>	

Tutorials

Transactional Workflows	20
<i>G. Vossen</i>	
From Action Theories to Updates, Transactions, Triggers and Agents	26
<i>C. Baral and J. Lobo</i>	
Data Warehousing and OLAP for Decision Support	33
<i>S. Chaudhuri and U. Dayal</i>	

Materialized View Maintenance

Maintaining Constrained Transitive Closure by Conjunctive Queries	35
<i>G. Dong and K. Ramamohanarao</i>	
Incremental Updates for Materialized OQL Views	52
<i>D. Gluche, T. Grust, C. Mainberger, and M. H. Scholl</i>	
View Maintenance Using Conditional Tables	67
<i>H. Shu</i>	

Extending DBMS Features

Adding Uniqueness Constraints to Description Logics	85
<i>A. Borgida and G. Weddell</i>	

A Point-Based Temporal Extension of SQL	103
<i>D. Toman</i>	
Attribute-Oriented View Definitions in Relational and Deductive Databases	122
<i>I. S. Mumick and K. A. Ross</i>	

Database Updates

Exploiting Semantic of Typed Objects Under an Optimistic Control in the Transactional Deferred Update Model: A Promising Approach	140
<i>M. Mahoui-Guerni</i>	
Logical Updating of Object Class Structures	158
<i>D. Theodoratos</i>	
An Approach to Obtain Intensional Translations for Consistent View Updating	175
<i>D. Costal, E. Teniente, and T. Urpí</i>	

Managing Change in Object Databases

Trigger Inheritance and Overriding in Active Object Database Systems	193
<i>E. Bertino, G. Guerrini, and I. Merlo</i>	
Object Deltas in an Active Database Development Environment	211
<i>A. Sundermier, T. Ben Abdellatif, S. W. Dietrich, and S. D. Urban</i>	
The COAST Project: Design and Implementation	229
<i>S.-E. Lautemann, P. Eigner, and C. Wöhrle</i>	

Semantics of Active Databases

Formal Characterizations of Active Databases: Part II	247
<i>C. Baral, J. Lobo, and G. Trajcevski</i>	
The Nonmonotonic Semantics of Active Rules in Deductive Databases	265
<i>C. Zaniolo</i>	
Datalog++: A Basis for Active Object-Oriented Databases	283
<i>F. Giannotti, G. Manco, M. Nanni, and D. Pedreschi</i>	

Formal Semantics

Comparison of Categorical Foundations of Object-Oriented Database Model	302
<i>T. Hruška and P. Kolenčák</i>	
Well-Founded Semantics for Deductive Object-Oriented Database Languages	320
<i>W. May, B. Ludäscher, and G. Lausen</i>	
Deterministic Semantics for Datalog [∞] : Complexity and Expressive Power	337
<i>S. Greco and D. Saccà</i>	

New Directions

On Implementing Structured Document Query Facilities on Top of a DOOD	351
<i>F. Neven and J. Van den Bussche</i>	
A Data Mining Algorithm Optimal for Single Rules	368
<i>K. Jim, J. Lai, and B. Wüthrich</i>	
On a Declarative Semantics for Web Queries	386
<i>R. Himmeröder, G. Lausen, B. Ludäscher, and C. Schlepphorst</i>	
Rule-Based Generation of Logical Query Plans with Controlled Complexity	399
<i>K. Aberer, D. Che, and K. Böhm</i>	

Short Papers

A Rule-Based Data Manipulation Language for OLAP Systems	417
<i>M.-S. Hacid, P. Marcel, and C. Rigotti</i>	
A General Model for Event Specification in Active Database Management Systems	419
<i>D. Zimmer, A. Meckenstock, and R. Unland</i>	
Optimizing Large OODB Queries	421
<i>L. Fegaras</i>	
Nonmonotonic Inheritance Through Specialization	423
<i>E. Nantajeewarawat and V. Wuwongse</i>	

Overview of Dynamic Query Evaluation in Intensional Query Optimization	425
<i>P. Godfrey and J. Gryz</i>	
Towards Efficient Evaluation of Methods by Reduction	427
<i>P.-T. Kandzia</i>	
Author Index	429
